our dictum

Wizard'14 THEATRHYTHM

'Dancing is the loftiest, the most moving, the most beautiful of the arts, because it is not mere translation or abstraction from life; it is life itself. It needs no language. Our bodies speak a language of its own and it gives visibility to music'

ITM Global School participated in Wizard'14 Dance Competition and Fashion Show on 6th February 2015. It was organized by the prestigious ITM University Gwalior. The venue for the event was Sithouli Campus of ITM Group of Institutions, Gwalior. The day saw the audience enjoying themselves in spite of the sharp chill of the day. The little Globians performed two group dances- one was classical and the other was folk. The attire used by the children was extra ordinary and very expressive. Both the dances had their own specific costumes with bright and colourful jewellery expressing elation and joy. These dances depict the exclusive art within India's cultural heritage. The children performed very well with great confidence in front of a huge audience. The other event of the evening was the Fashion Show. The students of ITM Global

School put on a vibrant show for the audience in the open air auditorium. The girls wore flowing colourful lehengas and sherwanis made of silk with brocades and made perfect partners with the boys in their smart and crisp winter blazers and bright red track suits. Even the rain did nothing to dampen their spirits. The grace and poise with which ITM Global School Students walked and shared the ramp with each other was an evidence of their brimming confidence. It was an evening dedicated to dance, glamour and style.

Reuse - Reduce - Recycle

'It is high time to realize that our responsibility to the coming millions is like that of parents to their children, and that in wasting our resources we are wronging our descendants'.

ITM Global School organized Best from the Waste Competition on 3rd February 2015 for all the students who love to create things and derive pleasure from doing so, instead of just being glued to TV screens. Little hands and imaginative minds came together in a creative burst of energy during the competition. The innovative Globians participated in the competition and surprised everyone with their flawless imagination flowing into useful objects

like frames, vase, boats, kites, wall hangings and many decorative pieces. From the waste items, they created an amazing array of display items and useful everyday objects leaving everyone

mesmerized and totally impressed.

It was nice to see the awareness for recycling among the students. The young Globians expressed their imagination and

showcased their creative streak. All the Judges appreciated the efforts the children had put in to sensitize everyone to recycle. And we came to know about the creativity and ingenuity of our kids, as they came up with brilliant ideas. They learnt how to use junk and trash stashed up in the hidden corners of our home. The event provided the students, their parents and the teachers with an experience of life time and aroused their freethinking, creativity and imagination.

Fight Against FLU

“Let us become a Health Science Institution and utilize best practices to respond to a health need on campus”

ITM Global School organized a vigorous awareness campaign for school children, their parents, people of various communities and health officials on 07th February, 2015, in view of the outbreak of Swine Flu in Gwalior. Ms Sandhya Mishra, Lecturer SONS ITM

University Gwalior conducted the whole session and gave a very nice presentation about the symptoms, treatment and waste management at the time of swine flu. To make the programme more interesting, a skit was organized by the students of ITM University Gwalior, so that the children can learn about the virus in an interactive and engaging way.

Ms. Mishra focused on the personal hygiene, which is the first step to good grooming and good health so that everybody may start following the 7 steps of hand washing and other precautionary measures. She further reiterated the key points like 'elementary cleanliness and health issues and elaborated on how an

absence of cleanliness causes certain diseases that we may not even be aware of: many people with bad breath are blissfully unaware of it; some problems may not be our fault at all, but improving standards of hygiene will control these conditions; and every external part of the body demands a basic amount of attention on a regular basis. She further added that it is a must to protect ourselves and our families from flu by taking everyday precautions like washing our hands, covering our cough, and staying away from sick people. These are the best ways to keep ourselves healthy.

It ended with some practical demonstration of key points on health and hygiene so that the students may start following it immediately to fight the menace of Flu.
